

## **Informed Consent**

I'm Khadija, a final year Master's student in Clinical Psychology. You are being asked to take part in a research study conducted as part of an academic thesis. This study aims to examine levels of hopelessness in young adults and evaluate the effectiveness of a structured psychological intervention. If your score falls within the moderate to high range of hopelessness, you will be contacted for further experimentation, subject to your consent. Your participation is entirely voluntary, and you may withdraw from the study at any time without any penalty. All information collected will be kept confidential and used solely for research purposes. Your identity will not be disclosed in any reports or publications. The procedures used in this study are safe and non-invasive. However, if you experience any discomfort, you are free to pause or discontinue participation at any point.

For any questions regarding the study, you may contact:

## BHS

Please read each statement carefully and indicate whether it describes your feelings over the past week by selecting either 'True' or 'False.'

| Sr. No. | Statements                                                                              | True | False |
|---------|-----------------------------------------------------------------------------------------|------|-------|
| 1.      | I look forward to the future with hope and enthusiasm.                                  | True | False |
| 2.      | I might as well give up because I can't make things better for myself.                  | True | False |
| 3.      | When things are going badly, I am helped by knowing they can't stay that way forever.   | True | False |
| 4.      | I can't imagine what my life would be like in 10 years.                                 | True | False |
| 5.      | I have enough time to accomplish the things I most want to do.                          | True | False |
| 6.      | In the future, I expect to succeed in what concerns me most.                            | True | False |
| 7.      | My future seems dark to me.                                                             | True | False |
| 8.      | I expect to get more good things in life than the average person.                       | True | False |
| 9.      | I just don't get the breaks, and there's no reason to believe I will in the future.     | True | False |
| 10.     | My past experiences have prepared me well for the future.                               | True | False |
| 11.     | All I can see ahead of me is unpleasantness rather than pleasantness.                   | True | False |
| 12.     | I don't expect to get what I really want.                                               | True | False |
| 13.     | When I look ahead to the future, I expect I will be happier than I am now.              | True | False |
| 14.     | Things just won't work out the way I want them to.                                      | True | False |
| 15.     | I have great faith in the future.                                                       | True | False |
| 16.     | I never get what I want, so it's foolish to want anything.                              | True | False |
| 17.     | It is very unlikely that I will get any real satisfaction in the future.                | True | False |
| 18.     | The future seems vague and uncertain to me.                                             | True | False |
| 19.     | I can look forward to more good times than bad times.                                   | True | False |
| 20.     | There's no use in really trying to get something I want because I probably won't get it | True | False |

## MDD Checklist

**Instructions:** Check (✓) symptoms present during the same 2-week period that represent a change from previous functioning.

| Symptoms                                                                                                                          | Present (✓)              | Absent (X)               |
|-----------------------------------------------------------------------------------------------------------------------------------|--------------------------|--------------------------|
| 1. Depressed mood most of the day, nearly every day (or irritable mood in children/adolescents)                                   | <input type="checkbox"/> | <input type="checkbox"/> |
| 2. Markedly diminished interest or pleasure in most activities (anhedonia)                                                        | <input type="checkbox"/> | <input type="checkbox"/> |
| 3. Significant weight loss/gain or decrease/increase in appetite                                                                  | <input type="checkbox"/> | <input type="checkbox"/> |
| 4. Insomnia or hypersomnia nearly every day                                                                                       | <input type="checkbox"/> | <input type="checkbox"/> |
| 5. Psychomotor agitation or retardation observable by others                                                                      | <input type="checkbox"/> | <input type="checkbox"/> |
| 6. Fatigue or loss of energy nearly every day                                                                                     | <input type="checkbox"/> | <input type="checkbox"/> |
| 7. Feelings of worthlessness or excessive/inappropriate guilt                                                                     | <input type="checkbox"/> | <input type="checkbox"/> |
| 8. Diminished ability to think, concentrate, or indecisiveness                                                                    | <input type="checkbox"/> | <input type="checkbox"/> |
| 9. Recurrent thoughts of death, suicidal ideation, suicide attempt, or specific suicide plan                                      | <input type="checkbox"/> | <input type="checkbox"/> |
| 10. Symptoms have been present for at least 2 weeks                                                                               | <input type="checkbox"/> | <input type="checkbox"/> |
| 11. Symptoms cause clinically significant distress or impairment in social, occupational, or other important areas of functioning | <input type="checkbox"/> | <input type="checkbox"/> |
| 12. Symptoms are not attributable to a substance or another medical condition                                                     | <input type="checkbox"/> | <input type="checkbox"/> |
| 13. No history of manic or hypomanic episode                                                                                      | <input type="checkbox"/> | <input type="checkbox"/> |
